Functions and performance levels:

The garment offers limited protection against mechanical risks arising from impact and abrasion in case of a fall while participating in motorcycling activities: CE-Certified incorporated impact protectors provide strengthened protection.  
This PPE item has reached the following performance:

**Class AA (\*) = Medium-duty protective garments:** the second highest level of protection, against the risks of the greatest diversity of riding activities. These garments are expected to have lower ergonomic and weight penalties than AAA garments, which some riders will not find acceptable for their specific riding activities. Protective function is linked to the correct fit of the garment – also the inner impact protectors must be kept in their place: this falls within the responsibility of the user.

**(\*) =** The applied Technical Draft document currently provides different levels of protection for garments including protectors/shells: from class AAA (highest level of performance) to class AA (medium level) to class A (lower level); - class B for garments not including protectors / shells = just abrasion protection; - class C for Impact protector ensemble garments.

Marking:

printed on stitched labels and displaying the following information:

- **CE Marking;**
- Name/trademark and web contact of the Manufacturer;
- item designation;
- pictogram to indicate the intended use (motorcycling) + class of protection achieved + reference to the Technical Draft;
- pictogram instructing to read the User Manual;
- on extra labels: material composition and cleaning instructions;
- additional info: nr. of the Notified Body, "Made in...", warnings, internal codes.
