PURSUIT GTX JACKET

When the development process started, our aim was to create a jacket with all the functional and protective features you need. A jacket designed for long-distance, urban commuters that ride 365 days a year on two wheels, in any type of weather imaginable. Mission: Accomplished.

The laminated GORE-TEX® outer shell is extremely breathable and, 100% waterproof. Being a laminated outer shell, the water pick-up is virtually non-existent, so the jacket stays dry and lightweight all the time.

This plays a huge role in preventing hypothermia during winter or colder rides. When used without the included thermal liner, there's an unsurpassed breathability making this jacket comfortable to wear in warmer conditions. Thus, you have here an almost four-season jacket.

3HS20003070X / PURSUIT GTX JACKET

FEATURES

GORE-TEX

REMOVEABLE LINING

WATERPROOF

PROTECTOR POCKET

WINDPROOF

REFLECTIVE ELEMENTS

BREATHABLE
