

EU Type Examination Certificate

Date: 2020/10/05

n. **584204102/OE**

Validity:
2025/10/04

The hereunder described items of Personal Protective Equipment have overcome positively the "EU type examination" (Module B), proving their conformity to the safety and health requirements of the Regulation (EU) 2016/425 (Annex II)

Manufacturer: **KTM AG**
(Responsible of the PPE) Stallhofnerstraße 3, 5230 Mattighofen - AUSTRIA

Type of PPE: **Protective gloves for motorcycle riders**

Category of PPE: **II** : "medium" risks.
This certificate is based on reference standards listed below: its validity is no longer ensured should new version of the standards come into force.

Model **"FAST GT GLOVES"**

Description:

model: five fingers;

palm side:

- black grain leather "Goatskin leather" (declared thickness ~0.8mm) matched with black knitting "Polyester fabric Bemberg";
- black grain leather partially perforated "Goatskin leather" (declared thickness ~0.8mm) matched with black knitting "Polyester fabric Bemberg";
- black grain leather "Conductive goatskin leather" (declared thickness ~0.8mm) on the top of the thumb;

back side:

- black grain leather "Goatskin leather" (declared thickness ~0.8mm) matched with black knitting "Polyester fabric Bemberg";
- black grain leather "Goatskin leather" (declared thickness ~0.8mm) stitched with white foam material and white fabric, internally matched with black knitting "Polyester fabric Bemberg";
- orange grain leather "Goatskin leather" (thickness: about 0.7 mm) on back of the thumb;
- black fabric "Cordura Polyester-Elastane" matched with black knitting "Polyester fabric Bemberg";

side wall of index: orange grain leather "Goatskin leather" (thickness: about 0.7 mm); black grain leather "Conductive goatskin leather" on top of index finger;

side wall of little finger: black grain leather "Goatskin leather" (declared thickness ~0.8mm);

partial reinforcements:

- reversed black grain leather "Goatskin leather" (declared thickness ~0.8mm);
- black grain leather "Goatskin leather" (declared thickness ~0.8mm);
- black grain leather "Goatskin leather" (declared thickness ~0.8mm) padded with grey foam material;

fourchettes: black grain leather "Goatskin leather" (declared thickness ~0.8mm); black grain leather "Conductive goatskin leather" (declared thickness ~0.8mm) on the top of index finger;

elastic wrist-band: black elastic band, applied internally on the palm side;

cuff: black grain leather "Goatskin leather" (declared thickness ~0.8mm) matched with black knitting "Polyester fabric Bemberg"; black fabric "Cordura Polyester-Elastane" matched with black knitting "Polyester fabric Bemberg";

fastening system: flap made of black grain leather "Goatskin leather" (declared thickness ~0.8mm) matched with black knitting "Polyester fabric Bemberg" closed with black hook and loop fastener "Velcro closure nylon" on the palm side of the glove;

reinforcement on palm basis (impact abrasion area): black grain leather "Goatskin

leather" (declared thickness ~0.8mm) stitched with black fabric dotted with polymeric material "Superfabric" padded with grey foam material (declared thickness 3mm) lined internally with red fabric;

knuckle reinforcements: preformed black polymeric material "TPU injected protector" with metallic net, matched with black adhesive knitting and padded with grey foam material matched internally with black knitting;

edging: black knitting coated with black polymeric material "PU binding".

Technical Standard: **EN 13594:2015** Protective gloves for motorcycle riders – requirements and test methods.

Intended use: for motorcycling activities, intended to give protection against ambient conditions together with limited mechanical protection to the hands and wrists in accidents.

Size range: from S/8 to XXL/12

Technical File: **DC-11779**

Test report: **RCT n° 3913204/E**

Functions and performance levels:
EN 420:2003 + A1:2009

EN 13594:2015

Protective gloves. General requirements and test methods:

the gloves satisfy the general requirements of design and manufacturing, innocuousness, ergonomic properties.

Protective gloves for motorcycle riders:

According to the basic requirements tested and assessed, this glove has obtained an overall performance level of **1** (*)

KP = additional property indicating the presence of the knuckle protection.

(*): the higher level provided by the technical standard is level 2, granted to gloves providing an increased protection with respect to level 1 but might have weight and ergonomic restriction penalties.

Marking: printed on different labels and displaying the following information:

- **CE Marking;**
- Name / Trademark of the Manufacturer;
- size indication (size according to EN 420 + commercial size);
- pictogram for motorcycling use + overall level of performance achieved during laboratory tests + symbol KP indicating the presence of knuckle protection + nr. and year of the Standard of reference;
- product name;
- additional information: care label symbols and instructions + composition materials + internal codes + "Made in..."
