

KTMAPEX

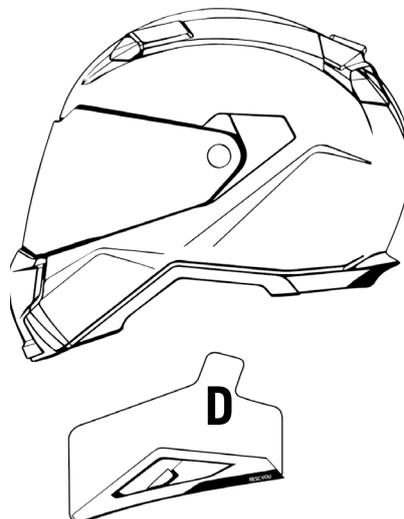

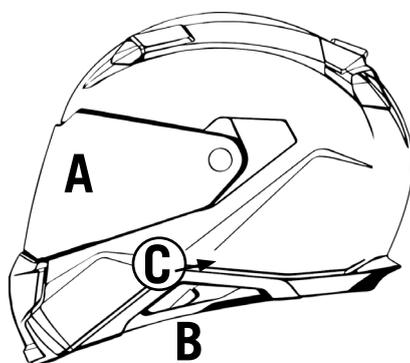

WITH PATENTED RESC.YOU SYSTEM

PURPOSE OF RESC.YOU:

Resc.you is a patented system to help and rescue the life of a motorcycle rider. In the case of a crash the most critical injuries are around head and cervical spine. Many times the cervical spine gets hurt by pulling of the rider's helmet. With the Resc.you system the cheekpads can be removed by pushing a button on the outside of the helmet. So the helmet can be pushed off the head more easily. This is a safety feature and should be used as such – not unnecessarily. Riding without Resc.you is unsafe.

HOW TO OPERATE IN CASE OF EMERGENCY:

- A) At first open the visor to communicate with the rider and help him breathe more easily.
- B) Open the chin strap completely.

- C) Gently push the button on the cheekpad until you hear the system opening. Hold the button.
- D) Slowly remove one cheekpad downwards until it is fully released out of the helmet.
- E) After the first cheekpad is fully released do the same on the other side. Follow C)-D).

To put the system back in place make sure the cheekpads are correctly in place and the system locks by a double click system. Do not ride with the system unlocked! Use in case of emergency only.

HOMOLOGATION	ECE R-22.05
MATERIAL	X2F StoneFibre
SIZES	XS-XXL
WEIGHT	approx. 1.550 ± 50G
CHIN STRAP	DD ring
INNERLINER	removable & washable lining
VISOR	Antiscratch & Antifog coated, Pulltight system
VENTS	shovel chin vent, permanent visor ventilation
EXTRAS	RESC.YOU CHEEKPAD RELEASE SYSTEM FOR EMERGENCY
